Income

Changes in income by gender.
Proportion of respondents by gender who reported having lower income now than before the pandemic.

Education

Decrease in academic skill by student gender.
Proportion of students who experienced lower than expected math skills.

Survey size

Over 621,000 responses from 21 countries, with 40,613 responses from India.

Findings from the Pandemic Recovery Survey (PRS), a collaboration between the Institute for Health Metrics and Evaluation (IHME), Ludwig-Maximilian University Munich (LMU), University of Maryland (UM), and Meta. Respondents were randomly selected in 21 countries between March and May 2023. For more information, please visit https://www.healthdata.org/research-analysis/health-policy-planning/evaluations/pandemic-recovery-survey.

CHILDHOOD VACCINES

Among parents of children under age 6, 31.6% reported that their child was not up to date on routine vaccines. Those most likely to have their child fully vaccinated and intend to vaccinate in the future came from more financially stable households.

DROPPED OUT OF SCHOOL DURING THE PANDEMIC

13% of students in India dropped out of school during the pandemic. The top reason for dropping out of school besides graduating was that they could no longer afford it.

Trust

People in India considered the military the most trustworthy and considered community leaders the least trustworthy.
